# Hello World

```
1 // Includes the code from the standard (std for short)
2 // library needed to do input and output (io).
3 #include <stdio.h>
4
5 // The main function.
6 // In C, the main function returns an error code, which
7 // is an int. 0 means 'no error'.
8 int main() {
9
10     // printf prints its argument to the terminal
11     printf("Hello, world!\n");
12
13     return 0;
14 }
```
